Department of Computer Science
Faculty of Electrical Engineering and Computer Science
VŠB - Technical University of Ostrava

# Course overview

1. Artificial Neural Networks
2. Convolution Neural Networks
3. Recurrent Neural Networks
4. Encoder-Decoder Architecture
5. Text processing
6. Transformer models
7. ...

# Course Evaluation - Full-time students

- Exercise tasks finishing (10 to 20 points):
  - up to 2 points for finishing task at the exercise or at home.
- Project with Convolutional Neural Networks (10 to 20 points):
  - Select a smaller dataset and apply a Convolutional Neural Networks.
  - A Jupyter Notebook with description.
- Project with Recurrent Neural Networks (10 to 20 points):
  - Select a smaller dataset and apply a Recurrent Neural Networks.
  - A Jupyter Notebook with description.
- Larger project realization from external server, e.g. KAGGLE (20 to 40 points):
  - Select a proper dataset and problem definition from the external server, e.g. Kaggle, (selection have to be confirmed by the lecturer)
  - A Jupyter Notebook with description of the steps.
